Date	01 october 2022
Team Id	**PNT2022TMID33733**
Project Name	**Project – AI Based localization and classification of skin disease with erythema**
Maximum Marks	**4 marks**

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's
behaviours and attitudes.

It is a useful tool to helps teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Says

- Disease Prediction
- Artificial Intelligence-based recommendation system
- Skin Disease with ERYTHEMA

Thinks

- Artificial Intelligence algorithms
- Artificial Intelligence tool
- To detect the person having such diseases by image

user

Does

- New technological movement
- Predictor Analysis
- Erythema presents in human body or not

Feels

- For Predicting the diseases
- Medical Field
- Skin disease detector
